Computing		1/1
Area of study (specialization)		Profile of study
Cybersecurity		general academic
Level of study		Course offered in
Second-cycle studies		English
Form of study		Requirements
full-time		compulsory
Number of hours		
Lecture	Laboratory classes	Other (e.g. online)
4		
Tutorials	Projects/seminars	
Number of credit points		
0		
Lecturers		
Responsible for the course/lecturer:		Responsible for the course/lecturer:

Beata Mrugalska, PhD, DSc, Eng., Assoc. Prof.

## Prerequisites

A student should have knowledge about the basic hazards to human health and life, be able to apply the knowledge they have learned throughout the entire study process and be able to take responsible action in an emergency.

### **Course objective**

To familiarize students with safety, hygiene at work and fire protection regulations in force at the Poznan University of Technology.

### **Course-related learning outcomes**

Knowledge

#### Skills

The student can - when formulating and solving engineering tasks - integrate knowledge from various areas of computer science (and, if necessary, also knowledge from other scientific disciplines) and apply a system approach, also taking into account non-technical aspects (K2st\_U5)

## POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Social competences

#### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Written test where at least one answer is correct (the answer is scored as 0 or 1); the credit is obtained after obtaining at least 50% of the points possible to get.

#### **Programme content**

Legal regulations regarding health and safety at work, including:

a) the rights and obligations of students at the University in the field of occupational health and safety and liability for violation of health and safety rules and regulations,

b) accidents and diseases,

c) prevention in the field of student health protection.

Impact of hazardous, harmful and nuisance factors on safety and health. Risk assessment of factors occurring in the processes of learning and working and in the field of methods of protection against threats to the health and life of students.

Problems related to the organization of workplaces, including ergonomics, including workstations with screen monitors and other office equipment.

Procedure in the event of accidents and emergency situations (e.g. fire, breakdown), including first aid in the case of an accident.

### **Teaching methods**

Lecture: multimedia presentation, films
