

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

Organization of production preparation

---

### Course

Field of study

Safety Engineering

Area of study (specialization)

Level of study

First-cycle studies

Form of study

part-time

Year/Semester

3/5

Profile of study

general academic

Course offered in

Polish

Requirements

elective

---

### Number of hours

Lecture

10

Tutorials

14

Laboratory classes

Projects/seminars

8

Other (e.g. online)

### Number of credit points

5

---

### Lecturers

Responsible for the course/lecturer:

Ph.D., Eng. Roma Marczevska-Kuźma

Mail to: roma.marczevska-

kuzma@put.poznan.pl

Phone. 61 665 33 78

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Responsible for the course/lecturer:

Ph.D., Katarzyna Szwedzka

Mail to: katarzyna.szwedzka@put.poznan.pl

Phone. 61 665 33 74

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

---

### Prerequisites

Student has knowledge of business processes, design, organization and implementation of the production processes, as well as in the area of design, evaluation, verification and implementation of production. Student is responsible and can interact with others and work in a team. Student understands the need for lifelong learning and acting in accordance with the rules.

### Course objective

Presenting knowledge of theoretical and practical problems connected with organization of production preparation and selected methods applied in this scope.

### Course-related learning outcomes

#### Knowledge

1. Knows the basic concepts of technical safety, safety systems, Occupational Health and Safety and problems of hazards and their consequences [P6S\_WG\_02].
2. Knows the basic concepts of the life cycle of industrial products and life cycle of socio-technical systems [P6S\_WG\_06].
3. Knows the basic concepts of engineering management in the field of product and process [P6S\_WG\_07].
4. Knows the current trends and best practices in safety engineering [P6S\_WK\_03].

#### Skills

1. Potrafi właściwie dobierać źródła oraz informacje 1. Is able to collect on the basis of the literature of the subject and other sources information on the problem, make critical analysis, assessment and synthesis [P6S\_UW\_01].
2. Is able to communicate using appropriately selected resources in a professional environment and in other environments [P6S\_UW\_02].
3. Is able to make a critical analysis of technical solutions in the field of security engineering [P6S\_UW\_06].
4. Can design the process that meets the requirements of safety engineering using appropriate methods and techniques [P6S\_UW\_07].
5. Is able to present the problem using appropriately selected resources within the framework of safety engineering [P6S\_UK\_01].
6. Is able to identify changes in requirements, standards, regulations, technical progress and the reality of the labor market, and on their basis determine the need to supplement own and other knowledge [P6S\_UU\_01].

#### Social competences

1. Is aware of the importance of knowledge in solving cognitive and practical problems in the scope of safety engineering and continuous improvement of the knowledge [P6S\_KK\_02].

2. Is aware of responsibility for own work and readiness to comply with the rules of working in a team and taking responsibility for the tasks carried out jointly [P6S\_KR\_02].

### **Methods for verifying learning outcomes and assessment criteria**

Learning outcomes presented above are verified as follows:

Rating forming:

- a) projects: on the basis of an assessment of the current progress of tasks,
- b) tutorials: on the basis of an assessment of the current progress of tasks,
- c) lecture: in the range of lectures based on oral answers to questions about the material covered in the current and previous lectures.

Rating summary:

- a) projects: grade point average, passing threshold: 60% of the points.
- b) tutorials: grade point average, passing threshold: 60% of the points.
- c) lecture: test, open and closed questions, passing threshold: 60% of the points.

### **Programme content**

Lecture:

Production process components, range of tasks. Production process management, technical humanization and economical aspects. Product traits, quality and reliability. Objectives, tasks and functions of product production preparation in industrial company. Constructive, technological and organizational preparation of the production - planning and designing, far-reaching and current activity. Notion and significance of technology of products construction. Curve of product life cycle. Costs of the production preparation. Documentation of production preparation and flow. Organization structure of product preparation units. Innovative processes in activity of industrial company.

Tutorial:

Linear correlation function, Analysis of production data by using KPIs, Evaluation of production effectiveness by using OEE, Pareto analysis based on acquired production data.

Project:

Arranging the course of any production process.

### **Teaching methods**

Lecture - multimedia lecture, case study analysis.

Projects - multimedia lecture, work in teams, problem-solving tasks set by the teacher, presentation of solutions and forum discussion group.

Tutorials - multimedia lecture, work in teams, problem-solving tasks set by the teacher, presentation of solutions and forum discussion group.

## Bibliography

### Basic

4. Wójcik J., Wybrane problemy w przygotowaniu produkcji nowego wyrobu w małych i średnich przedsiębiorstwach, Zeszyty Naukowe Politechniki Śląskiej "Organizacji i Zarządzania", z. 83, Nr. kol. 1941, 2015.
5. Golińska P., Fertsch M., Organizacja produkcji i logistyki w przemyśle samochodowym, Wydawnictwo Politechniki Poznańskiej, Poznań 2012.
6. PN-EN ISO 9001:2015 Systemy zarządzania jakością wymagania.
7. PN-ISO 45001:2018 Systemy zarządzania bezpieczeństwem i higieną pracy. Wymagania i wytyczne stosowania.

### Breakdown of average student's workload

	Hours	ECTS
Total workload	125	5,0
Classes requiring direct contact with the teacher	42	2,0
Student's own work (literature studies, preparation for tutorials and projects, preparation for tests, project and tutorials preparation, preparation for presentation of solutions - project and tutorials) <sup>1</sup>	83	3,0

<sup>1</sup> delete or add other activities as appropriate
