

COURSE DESCRIPTION CARD - SYLLABUS

Course name

The audit of OHS systems

Course

Field of study

Safety Engineering

Area of study (specialization)

Integrated Management of Safety in the Organization

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

2/3

Profile of study

general academic

Course offered in

Polish

Requirements

elective

Number of hours

Lecture

15

Laboratory classes

Other (e.g. online)

Tutorials

15

Projects/seminars

15

Number of credit points

3

Lecturers

Responsible for the course/lecturer:

Ph.D., Eng. Tomasz Ewertowski,

Mail to: tomasz.ewertowski@put.poznan.pl

Phone: 61 6653365

Responsible for the course/lecturer:

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Prerequisites

A student should have basic knowledge in the field of quality management, pro-quality systems and

principles, as well as systemic ensuring work safety, be able to interpret basic concepts and rules related to safety, and be aware of the importance of managing occupational health and safety.

Course objective

Developing understanding of theoretical aspects and practical skills in auditing occupational health and safety systems

Course-related learning outcomes

Knowledge

1. A student knows issues of work safety and system management in this area [P7S_WG_02],
2. A student knows the issues of risk analysis, threats and their effects in the work environment [P7S_WG_05],
3. A student knows the requirements of ISO 45001 in terms of criteria for auditing the occupational health and safety management system [P7S_WK_02],
4. A student knows the basic methods, techniques and rules for auditing health and safety management systems, also using information technologies, information protection and computer support [P7S_WK_03],
5. A student knows the auditor's code of ethics [P7S_WK_04],

Skills

1. A student is able to properly select sources and information from them for the purpose of auditing in order to assess, critically analyze and synthesize this information, formulate conclusions and comprehensively justify the opinion [P7S_UW_01],
2. A student is able to apply various audit techniques to communicate in a professional environment and in other environments [P7S_UW_02],
3. A student is able to recognize system and non-technical aspects as well as socio-technical, organizational and economic aspects during the audit [P7S_UW_03],
4. A student is able to present by means of properly selected means the scope of the prepared audit [P7S_UK_01],
5. A student is able to identify changes in requirements, standards, regulations and technical progress that are the basis for OHS management systems, and based on them determine the needs to supplement own and other knowledge [P7S_UU_01],

Social competences

1. A student is aware of recognition of cause and effect relationships in the implementation of audit and ranking the significance of alternative or competitive tasks [P7S_KK_01],
2. A student is aware of recognition of the importance of knowledge in solving problems during the audit of the OHS management system and continuous improvement [P7S_KK_02],

3. A student is aware of responsibility for own work and readiness to comply with the principles of teamwork and taking responsibility for jointly implemented audit tasks [P7S_KR_02].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment:

- a) classes: current assessment (on a scale of 2 to 5) of the tasks assigned,
- b) projects: ongoing assessment of the progress of work on the selected project,
- c) lectures: discussion on lectures (partial points).

Summative rating:

- a) classes: average of partial tasks; credit after passing at least 3.0,
- b) projects: assessment of the submitted solution of the selected project; credit after passing at least 3.0,
- c) lectures: oral test in the last week of the semester (answers to 3 open questions from the content presented in the lecture; each question scored on a scale of grades from 2 to 5; partial points may increase the final grade).

For those willing, an additional opportunity to take the placement test to obtain a certificate of completion of the internal auditor course.

Programme content

Lecture: Interpretation of ISO 45001 and ISO 19011 in terms of auditor requirements, documenting information and searching for objective evidence. Introduction to auditing (types of audits, audit methods and principles, auditor competence). Audit preparation. Conducting audit activities.

Tutorials: Requirements for maintaining documented information. Preparation of an audit for an example case study. Audit scenes. Identifying incompatibilities. Audit documentation.

Project: OHS audit procedure with the necessary forms for the needs of the selected enterprise.

Teaching methods

Lecture: information and conversation lecture based on multimedia presentation.

Tutorials: performing the tasks given by the lecturer - practical exercises, staging method - scenarios, exercises with documentation, exercises with the ISO 45001 standard, case study (checklist, forms)..

The project classes: project method with reference to the real example.
