

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Natural Cosmetics

Course

Field of study

Pharmaceutical Engineering

Area of study (specialization)

-

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

3/5

Profile of study

general academic

Course offered in

polish

Requirements

elective

Number of hours

Lecture

0

Laboratory classes

0

Other (e.g. online)

0

Tutorials

15

Projects/seminars

0

Number of credit points

1

Lecturers

Responsible for the course/lecturer:

PhD Maria Urbańska

Responsible for the course/lecturer:

PhD Renata Dawid-Pać

Prerequisites

The basic knowledge of raw materials of natural origin.

Course objective

To acquaint the student with the chemistry of raw materials of natural origin. The student is acquiring the skill of independent selection of natural active ingredients for cosmetic formulations.

Course-related learning outcomes

Knowledge

1. The student knows of the natural raw materials used in the cosmetic industry [K_W13].
2. The student has detailed knowledge of plant raw materials, of animal and mineral origin for cosmetic use, their production and correct use in cosmetics formulations [K_W25].

Skills

1. The student is able to characterize the chemical composition of natural resources [K_U2].
2. The student has the ability to self-stud [K_U24].

Social competences

1. The student is ready for evaluation of one's knowledge, understands the need for further training [K_K1].
2. The student is aware of their liability for their work and responsibility for the results of the teamwork. The student is ready to make decisions independently. Has a sense of responsibility for one's work and is willing to comply with the principles of teamwork and taking responsibility for collaborative tasks are aware of their responsibility for their work and liability for the results of the teamwork [K_K2].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Active participation in the proposed classes. Observation of student work during laboratory classes. Correct performance of tasks and presentation of the laboratory report.

Programme content

The use of natural active ingredients - developing modern formulations based on scientific studies of the effect of natural raw materials on the skin, hair and nails condition.

Teaching methods

Precise fulfilment of the tasks entrusted by the teacher.

Bibliography

Breakdown of average student's workload

	Hours	ECTS
Total workload	25	1,0
Classes requiring direct contact with the teacher	15	0,6
Student's own work (literature studies, preparation for laboratory classes) ¹	10	0,4

¹ delete or add other activities as appropriate
