

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Supportive Processes Management in Industry 4.0

Course

Field of study

Engineering Management

Area of study (specialization)

The Enterprise Management of the Future

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

1/2

Profile of study

general academic

Course offered in

English

Requirements

compulsory

Number of hours

Lecture

15

Laboratory classes

Tutorials

Projects/seminars

15

Other (e.g. online)

Number of credit points

2

Lecturers

Responsible for the course/lecturer:

Ph.D. Eng., Edmund Pawłowski

Responsible for the course/lecturer:

Mail to: edmund.pawlowski@put.poznan.pl

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Prerequisites

Enterprise management

Course objective

Acquisition of knowledge and skills in designing industrial support processes 4.0

Course-related learning outcomes

Knowledge

has an extended knowledge of the subject of contextual sciences in relation to management sciences and ergological sciences and the research methods applied in them, as well as of the common and specific conceptual apparatus in relation to management sciences and technical sciences -

[P7S_WG_04]

has knowledge of the links existing in network organisations (corporations, holdings, clusters, etc.) and in-depth knowledge of organisational links between organisational units of the enterprise and virtual units - [P7S_WG_06]

has an in-depth knowledge of the nature of the sciences of management and their place and links to contextual and ergological sciences - [P7S_WG_08]

has an extended knowledge of technical systems, facilities and equipment, understands their role and importance in shaping economic organisations - [P7S_WG_10]

Skills

has the ability to apply the acquired knowledge in various scopes and forms, extended by a critical analysis of the effectiveness and usefulness of the applied knowledge - [P7S_UW_03]

has the ability to independently propose solutions to a specific management problem and carry out a decision-making procedure, in this respect - [P7S_UW_04]

can correctly analyze the causes and course of social processes and phenomena (cultural, political, legal, economic), to formulate their own opinions on the subject and to make simple research hypotheses and verify them - [P7S_UW_07]

Social competences

is aware of the interdisciplinary knowledge and skills needed to solve complex problems of the organisation and the need to create interdisciplinary teams - [P7S_KK_01]

be able to recognise the cause-and-effect relationships in achieving the objectives and rank the importance of alternative or competing tasks - [P7S_KK_02]

is able to plan and manage business ventures - [P7S_KO_03]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

The knowledge of the lectures is verified during the written test. Written test in two versions: 1/ 5 open questions, 2/ 10 multiple-choice test questions. Maximum number of points = 100. Positive score from 65 points.

Knowledge from the exercises is verified by defending the project.

Programme content

Industry 4.0 against the background of global industrial development. Organizational structure and business processes in the enterprise 4.0. Support processes in the enterprise 4.0. Cooperation and network connections in the scope of support processes. Logic of maintenance system development. Internet of things in maintenance processes

Teaching methods

1. lecture: Monographic lecture, case studies
- 2 Exercises: multimedia presentation illustrated with examples given on the board and project execution
