## POZNAN UNIVERSITY OF TECHNOLOGY

# EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

## **COURSE DESCRIPTION CARD - SYLLABUS**

Course name

Foreign language - English

Course

Field of study Year/Semester

Environmental Engineering 2/3

Area of study (specialization) Profile of study

general academic

Level of study Course offered in

First-cycle studies English

Form of study Requirements full-time compulsory

**Number of hours** 

Lecture Laboratory classes Other (e.g. online)

0 0

Tutorials Projects/seminars

30 0

**Number of credit points** 

2

**Lecturers** 

Responsible for the course/lecturer: Responsible for the course/lecturer:

dr Katarzyna Matuszak

## **Prerequisites**

The already acquired language competence compatible with level B1 (CEFR)

The ability to use vocabulary and grammatical structures required on the high school graduation exam with regard to productive and receptive skills

The ability to work individually and in a group; the ability to use various sources of information and reference works

# **Course objective**

- 1. Advancing students' language competence towards at least level B2 (CEFR).
- 2. Development of the ability to use academic and field specific language effectively in both receptive and productive language skills.
- 3. Improving the ability to understand field specific texts (familiarizing students with basic translation techniques).
- 4. Improving the ability to function effectively on an international market and on a daily basis.

## POZNAN UNIVERSITY OF TECHNOLOGY

# EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

## **Course-related learning outcomes**

### Knowledge

As a result of the course, the student ought to acquire field specific vocabulary related to the following issues:

- Elements of mathematics and geometry
- Description of charts and tables
- Ecology (recycling, greenhouse effect, ozone hole)

and to be able to define and explain associated terms, phenomena and processes.

#### Skills

As a result of the course, the student is able to:

- express basic mathematical formulas
- interpret data presented on graphs/diagrams
- give a talk on field specific or popular science topic (in English), and discuss general and field specific issues using an appropriate linguistic and grammatical structures
- formulate a text in English where he/ she explains/ describes a selected field specific topic

### Social competences

As a result of the course, the student is able to communicate effectively in a field specific/professional area, and to give a successful presentation in English.

# Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment: oral and written tests, MT test, presentations

Summative assessment: credit

#### **Programme content**

Developing general and technical vocabulary based on specialized technical texts. Developing the skill of understanding professional literature and expressing freely on topics including issues related to ecology (recycling, the greenhouse effect, the ozone hole). Description of phenomena, charts and tables.

## **Teaching methods**

Methods that use 4 basic skills - receptive (reading and listening) and productive (speaking and writing)

- input (feeding) methods (verbal and knowledge assimilation - text, article)

## POZNAN UNIVERSITY OF TECHNOLOGY

### EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

- seeking methods (independent learning) problem and practical-practical methods
- output (displaying) methods (using productive skills)
