

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

Introduction to Technology

### Course

Field of study

Logistic

Area of study (specialization)

Level of study

First-cycle studies

Form of study

part-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

### Number of hours

Lecture

16

Laboratory classes

Tutorials

14

Projects/seminars

### Number of credit points

4

### Lecturers

Responsible for the course/lecturer:

Prof. Edwin Tytyk, Ph.D., D.Sc., Eng.

Mail to: edwin.tytyk@put.poznan.pl

Phone: 61 665-33-77

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Responsible for the course/lecturer:

### Prerequisites

Knowledge of mathematics and physics in middle school. Ability to solve simple problems in mathematics and physics. Group work, interest in technology.

### Course objective

To familiarize students with the basic problems associated with the development of technology, make aware of the logic of changes in manufacturing techniques and human relationships with technology and the environment. The systemic nature of these compounds is emphasized. Familiarizing students with modern trends in the development of technology and technology as well as the organization of human work aims to develop practical skills in identifying, understanding and describing contemporary techniques and technologies used in industry and services.

### Course-related learning outcomes

Knowledge

**Student:**

- knows the basic issues of construction, technology and techniques related to logistics [P6S\_WG\_01]
- knows the basic issues of mechanics, construction and operation of machinery related to logistics [P6S\_WG\_02]

**Skills**

**Student:**

- can apply the right experimental and measurement techniques to solve the problem within the studied subject, including computer simulation within logistics and its specific issues, and supply chain management [P6S\_UW\_03]
- able to assess and make a critical economic analysis of the selected problem, which falls within the framework of logistics and its specific issues, and supply chain management [P6S\_UW\_06]
- can identify changes in requirements, standards, regulations, technical progress and the reality of the labor market, and based on them determine the needs of supplementing knowledge [P6S\_WG\_01]

**Social competences**

**Student:**

- is aware of initiating activities related to the formulation and transfer of information and cooperation in society in the field of logistics [P6S\_KO\_02]

**Methods for verifying learning outcomes and assessment criteria**

Learning outcomes presented above are verified as follows:

Lecture: Knowledge acquired on lectures is verified by two 45-minute examinations realized on 7 i 15 lecture. Each examination consists with 10-15 questions (closed and open), estimated differently.

Threshold attest: 50% points.

Tutorials: Attest examination: oral answers, open questions, multi-choice test and activity on tutorials.

Threshold attest: 50% points.

**Programme content**

Elements of the history of technology against the backdrop of human evolution and the development of societies. Techniques and technologies regarding materials (among others: plastic forming, casting, machining, heat treatment and thermo-chemical processes). Connections used in machine construction, principles of construction and functioning of machine components (bearings, gears, clutches, brakes). Techniques and technologies in production, distribution, transport and other logistic processes. Selected problems of modern technical civilization. Ethical problems of the user and the creator of the technique.

**Teaching methods**

Lectures with multimedia presentation

Accounting and designing exercises on topics related to lectures.

**Bibliography**

#### Basic

1. Wprowadzenie do techniki, Edwin Tytyk, Marcin Butlewski, Wyd. Politechniki Poznańskiej, Poznań, 2008
2. Wprowadzenie do techniki - materiały do ćwiczeń i wykładów, Zbigniew Tomaszewski, Wyd. Politechniki Poznańskiej, Poznań, 2002
3. Encyklopedia technik wytwarzania stosowanych w przemyśle maszynowym, Tom I, Jerzy Erbel (red.), Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 2001
4. Encyklopedia technik wytwarzania stosowanych w przemyśle maszynowym, Tom II, Jerzy Erbel (red.), Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 2001

#### Additional

1. Technologia maszyn, Stefan Okoniewski, WSiP, Warszawa, 1999
2. Powszechna historia techniki, Bolesław Orłowski, Oficyna Wydawnicza Mówią Wieki, Warszawa, 2010
3. Dawne wynalazki, Peter James, Nick Thorpe, Świat Książki, Warszawa, 1997

#### Breakdown of average student's workload

	Hours	ECTS
Total workload	100	4,0
Classes requiring direct contact with the teacher	30	1,0
Student's own work (literature studies, preparation for tutorials, preparation for tests and exam <sup>1</sup> )	70	3,0

<sup>1</sup> delete or add other activities as appropriate
