

COURSE DESCRIPTION CARD - SYLLABUS

Course name

English

Course

Field of study

Aerospace Engineering

Area of study (specialization)

Level of study

First-cycle studies

Form of study

part-time

Year/Semester

1/2

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

Laboratory classes

Other (e.g. online)

0

Tutorials

Projects/seminars

18

Number of credit points

2

Lecturers

Responsible for the course/lecturer:

mgr Kinga Komorowska

email: kinga.komorowska@put.poznan.pl

tel. 698921394

Centrum Języków i Komunikacji

ul. Piotrowo 3A, 60-965 Poznań

Responsible for the course/lecturer:

Eliza Ciałkowska-Günther

email: eliza.cialkowska-gunther@put.poznan.pl

tel. 505204226

Centrum Języków i Komunikacji

ul. Piotrowo 3A, 60-965 Poznań

Prerequisites

Knowledge: When entering the course a student ought to have language competence corresponding to a minimum level of B1 according to the description of language proficiency levels (CEFR)

Skills: Mastering grammatical structures and general vocabulary required in the basic matura exam in a foreign language in the field of productive and receptive skills

Social competences: Ability to work independently and in a team; ability to use various sources of information

Course objective

1. Bringing the language competence of students to the minimum level B2 (CEFR).

2. Developing the skills of effective use of the academic language and a specialist language appropriate for a given field, in terms of four language skills.
3. Improving the skills of working with technical texts on technical issues.
4. Improving the ability to function on the international labour market and in everyday life.

Course-related learning outcomes

Knowledge

1. Has basic knowledge of the vocabulary used in English to describe the technological support of air communication, flight control systems, safety procedures at the airport related to the presence of animals, airplane control surfaces, maneuvers performed by the aircraft
2. Has basic knowledge of the vocabulary used in English to describe mathematical operations and the data presented in the diagram / graph. Has knowledge of formulating a text in English explaining / describing a selected specialist issue

Skills

1. Can give a presentation in English on a technical or popular science topic, and can express himself/herself on general and technical topics using an appropriate vocabulary and grammatical structures
2. Can express basic mathematical operations in English and interpret data presented in a diagram / graph. formulate a text in English explaining / describing the selected specialist issue
3. Can use one additional foreign language in verbal communication at the level of everyday language, can describe in this language issues related to the field of study, can prepare technical descriptive and drawing documentation of an engineering, transport and / or logistic task
4. Can use the following languages: native and international to a degree enabling the understanding of technical texts and writing technical descriptions of machines in the field of aviation and aerospace using dictionaries (knowledge of technical terminology)

Social competences

1. Understands the need for lifelong learning; can inspire and organize the learning process of other people
2. he is ready to critically assess his knowledge and received content, recognize the importance of knowledge in solving cognitive and practical problems, and consult experts in the event of difficulties with solving the problem on his own

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

1. Formative assessment: current assessment during classes (presentations, tests)
2. Summative assessment: passing grade (credit)

Programme content

1. Mathematical terms
2. Graph descriptions
3. ICAO alphabet - pronunciation of letters and numbers in aviation
4. Construction of the airport - names of the elements of the airport
5. Construction of the aircraft - names of the parts of the aircraft
6. Ground operations - terms related to the ground movement of aircraft
7. Navigation
8. Coordinates
9. Elements of terrain topography

Teaching methods

The exercise method (subject exercises, practice exercises) - in the form of auditorium exercises (application of acquired knowledge in practice - may take various forms: solving cognitive tasks or training psychomotor skills; transforming a conscious activity into a habit through repetition)

Bibliography

Basic

1. Emery, Henry. Roberts, Andy. 2008. Aviation English for ICAO Compliance. Macmillan
2. Czerwiński, Piotr. Fleszar, Mateusz. 2015. English for Aviation Engineering . Rzeszów: Oficyna wydawnicza Politechniki Rzeszowskiej

Additional

1. Ellis, Ssue. Gerightly, Terence 2012. English for Aviation. Oxford

Breakdown of average student's workload

	Hours	ECTS
Total workload	55	2,0
Classes requiring direct contact with the teacher	25	1,0
Student's own work (literature studies, preparation for classes, preparation for tests,) ¹	30	1,0

¹ delete or add other activities as appropriate
