

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Production Management in Industry 4.0

Course

Field of study

Engineering Management

Area of study (specialization)

Managing Enterprise of the Future

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

1/2

Profile of study

general academic

Course offered in

English

Requirements

compulsory

Number of hours

Lecture

15

Tutorials

Laboratory classes

Projects/seminars

15

Other (e.g. online)

Number of credit points

3

Lecturers

Responsible for the course/lecturer:

Prof. Stefan Trzcieliński, Ph.D., D.Sc., Eng.

Mail to: stefan.trzcielinski@put.poznan.pl

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Responsible for the course/lecturer:

Ph.D., Eng. Edmund Pawłowski

Mail to: edmund.pawlowski@put.poznan.pl

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Prerequisites

General knowledge about machine technology, production control and infrastructure of Industry 4.0

The ability to thematic search and selection of literature sources.

Course objective

Preparation of the student to organize and manage production systems in the conditions of automated and robotic processes.

Course-related learning outcomes

Knowledge

The student explains advanced theories and models for digital management of manufacturing processes, including the application of technologies such as the Internet of Things (IoT), artificial intelligence (AI) and machine learning in the context of optimizing industrial performance [P7S_WG_04].

The student describes how to adapt organizational structures to the dynamic environment of Industry 4.0, including the field of automation and robotization of manufacturing processes [P7S_WG_05].

The student analyzes complex networked manufacturing systems and their impact on enterprise competitiveness and innovation [P7S_WG_06].

The student understands integrated manufacturing systems and real-time data management, key to operations management in Industry 4.0 [P7S_WG_10].

Skills

The student applies an interdisciplinary approach to analyzing and solving manufacturing problems, using analytical and simulation tools specific to the Industry 4.0 environment [P7S_UW_01].

The student designs and implements effective operational management strategies, taking into account changing requirements and risks in evolving industrial technologies [P7S_UW_04].

The student conducts a technology audit in a manufacturing company and identifies opportunities to apply Industry 4.0 solutions to improve operational efficiency [P7S_UW_09].

Social competences

The student integrates knowledge from different fields (engineering, IT, management) to create innovative manufacturing solutions within Industry 4.0 [P7S_KK_01].

The student evaluates the effects of introducing new technologies in industry on various areas of business, including sustainability, business ethics and human resource management [P7S_KK_02].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: Individual or team micro-tasks verifying understanding of lecture content done during the lecture.

Project: development of a team project.

Programme content

Technologies that changed the world. Operations / production management functions. Business context of operations / production management. Key technologies of Industry 4.0. Capital and organizational consequences of value stream flow; circular economy. Methods supporting the digital transformation of manufacturing enterprises.

Teaching methods

Conversational lecture with multimedia presentation.

Team project including elements of digital transformation of company into Enterprise 4.0.

Breakdown of average student's workload

	Hours	ECTS
Total workload	75	3,0
Classes requiring direct contact with the teacher	30	1,0
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests, project preparation) ¹	45	2,0

¹ delete or add other activities as appropriate
