

COURSE DESCRIPTION CARD - SYLLABUS

Course name

A Short Course in Occupational Safety

Course

Field of study

Engineering Management

Area of study (specialization)

-

Level of study

First-cycle studies

Form of study

part-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

polish

Requirements

compulsory

Number of hours

Lecture

4

Laboratory classes

0

Other (e.g. online)

0

Tutorials

0

Projects/seminars

0

Number of credit points

0

Lecturers

Responsible for the course/lecturer:

Ph.D., Eng., Adam Górny

Mail: adam.gorny@put.poznan.pl

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Responsible for the course/lecturer:

MSc. Eng., Sebastian Kubasiński

Mail: sebastian.kubasinski@put.poznan.pl

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Prerequisites

The student is capable of making responsible decisions and acting in situations of danger.

Course objective

Familiarizing students with threats to health and life associated with their presence on the university premises, as well as with the regulations, directives, rules, and procedures in force at Poznan University of Technology for dealing with situations posing threats to safety, including fire safety.

Course-related learning outcomes

Knowledge

The student defines and describes in-depth legal, ethical, social, and psychological aspects considered in professional activities in the field of safety engineering, particularly in the area of occupational safety [P7S_WK_01].

Skills

The student identifies changes in requirements, standards, regulations, innovations, and technological progress as well as economic realities, and appropriately utilizes them in solving problems in the area of occupational safety, taking into account the principles of ergonomics [P7S_UW_06].

The student identifies and recognizes hazards in the work environment, assesses their impact on the individual, organization, and its stakeholders, and indicates methods aimed at minimizing the effects of hazards considering eco-friendly solutions in the field of occupational safety [P

Social competences

The student correctly identifies and resolves dilemmas related to broadly defined safety in the area of their work, understands the necessity of raising public awareness in the need for developing safety in various areas of organizational functioning [P7S_KK_02].

The student is ready to initiate actions related to improving occupational safety, considering eco-friendly solutions [P7S_KK_03].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative Assessment:

Lecture: based on responses to current questions regarding issues discussed during the lecture.

Summative Assessment:

Lecture: passing in the form of a test in which at least one answer is correct (a response is scored as 0 or 1); a student passes after achieving at least 80% of the possible points.

Programme content

Lecture: Selected legal regulations in the field of labor law related to occupational safety and health, including: rights and duties of students and the University in the area of occupational safety and health, and liability for violations of occupational health and safety regulations and principles, accidents and illnesses, prevention in the field of student health protection. The impact of hazardous, harmful, and annoying factors on safety and health. Assessment of threats occurring in learning and working processes and characteristics of methods of protection against threats. Problems related to the organization of workstations, including principles of ergonomics, including workstations equipped with

screen monitors and other office devices. Procedures in the event of accidents and emergency situations (e.g., fire, failure), including the principles of providing pre-medical first aid to accident victims.

Teaching methods

Teaching Methods Lecture: The subject is conducted in the form of a conventional informational lecture, supported by multimedia presentations. During the lecture, problem-solving and student-activating methods are used, involving educational films and the analysis of typical situations - case studies.

Bibliography

Basic

1. Statut Politechniki Poznańskiej uchwalony przez Senat Akademicki Politechniki Poznańskiej (Uchwała Nr 175/2016-2020 z dnia 10 lipca 2019 roku).
2. Regulamin studiów stacjonarnych i niestacjonarnych pierwszego i drugiego stopnia, uchwalony przez Senat Akademicki Politechniki Poznańskiej (Uchwała Nr 42/2020-2024 z dnia 31.05.2021 r.).
3. Rozporządzenie Ministra Nauki i Szkolnictwa Wyższego z dnia 30 października 2018 r. w sprawie sposobu zapewnienia w uczelni bezpiecznych i higienicznych warunków pracy i kształcenia (Dz. U. 2018, poz. 2090).

Additional

1. Ustawa z dnia 3 marca 2022 r., Prawo o szkolnictwie wyższym i nauce (tekst jedn.: Dz.U. 2022 poz. 574).
2. Górny A., Zastosowanie środków technicznych i działań organizacyjnych w poprawie warunków pracy, Studia Ekonomiczne Regionu Łódzkiego, 2017, nr 24, ss. 205-216.
3. Kamińska J., Tokarski T., Jak zorganizować ergonomiczne stanowisko z komputerem?, Centralny Instytut Ochrony Pracy, Warszawa, 2016.
4. Kubasiński S., Sławińska M., Doskonalenie bezpieczeństwa pracy w świetle wymagań ISO 45001, Nauka i praktyka w bezpieczeństwie pracy, środowisku i zarządzaniu / red. Danuta Zwolińska - Katowice, Polska : Wyższa Szkoła Zarządzania Ochroną Pracy, 2019 - s. 131-142.

Breakdown of average student's workload

	Hours	ECTS
Total workload	4	0,0
Classes requiring direct contact with the teacher	4	0,0
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) ¹	0	0

¹ delete or add other activities as appropriate
