

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Theoretical basics of quality

Course

Field of study

Engineering Management

Area of study (specialization)

Level of study

First-cycle studies

Form of study

part-time

Year/Semester

3/5

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

10

Laboratory classes

Other (e.g. online)

Tutorials

Projects/seminars

Number of credit points

1

Lecturers

Responsible for the course/lecturer:

Ph.D., D.Sc., Eng. Agnieszka Misztal, University
Professor

Mail to: agnieszka.misztal@put.poznan.pl

Phone: 61 665 34 37

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Responsible for the course/lecturer:

Ph.D., Eng. Maciej Szafranski

Mail to: maciej.szafranski@put.poznan.pl

Phone: 61 665 34 03

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Prerequisites

Student has basic knowledge of set theory, has ability to translate numerical data into imaging of real processes, and conversely understands importance of saving product quality

Course objective

Getting to know methodology of qualitative approach in researching and shaping reality.

Course-related learning outcomes

Knowledge

The student discusses the history and pioneers of quality, basic quality terminology, and the concept of a qualitological approach to reality [P6S_WG_01].

The student describes the quality features of a product, including goods, services, non-conformities, defects, and components of comprehensive product quality [P6S_WG_03].

The student analyzes processes for determining and specifying quality requirements, basic quality operations, and the principles of standardization and standardization of quality requirements [P6S_WG_07].

Skills

The student applies theoretical knowledge of quality to analyze and assess quality management processes in organizations [P6S_UW_01].

The student analyzes the causes and processes of quality management, using analytical, simulation, and experimental methods [P6S_UW_07].

The student correctly uses normative systems and selected standards and rules in the context of quality management [P6S_UW_08].

Social competences

The student identifies cause-and-effect relationships in quality management and applies this knowledge to managerial decision-making [P6S_KK_02].

The student utilizes theoretical knowledge about quality in the practical context of managing organizations, integrating different aspects of quality [P6S_KK_02].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment: current assessment in class, partial points for participating during discussion

Collective assessment: oral form (end of semester) from material processed during lectures, 4-5 open questions, positive assessment 51%; partial points increase final grade

Programme content

Precursors of quality. Basic quality terminology. Qualitological approach to reality. Product quality features (product, service, incompatibilities and defects). Components of comprehensive product quality. Specifying and specifying requirements. Basic qualitative operations. Normalization and standardization of quality requirements.

Teaching methods

Didactic methods - problem lecture with multimedia presentation, video presentation, discussion, case study

Bibliography

Basic

1. Mantura W., Zarys kwalitologii, Wydawnictwo Politechniki Poznańskiej, Poznań 2010.
2. Kolman R., Kwalitologia : wiedza o różnych dziedzinach jakości, Wydawnictwo Placet, Warszawa 2009.
3. Prussak W., Jasiulewicz-Kaczmarek M., Elementy inżynierii systemów zarządzania jakością, Wyd. PP, Poznań 2010.
4. Kolman R., Inżynieria jakości, PWE, Warszawa 1992.

Additional

1. Gołaś H., Mazur A., Piasek P., Czajkowski P., Zastosowanie standaryzacji w procesie kontroli jakości wyrobów, Problemy Jakości 2/2017, s. 10-14.

3. Kindlarski E., Jakość wyrobów, PWN, Warszawa 1988.

Breakdown of average student's workload

	Hours	ECTS
Total workload	25	1,0
Classes requiring direct contact with the teacher	10	0,5
Student's own work (literature studies, preparation for tests) ¹	15	0,5

¹ delete or add other activities as appropriate
