POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

COURSE DESCRIPTION CARD - SYLLABUS

Course name
IT Systems Transition

Course

Field of study	Year/Semester
Engineering Management	3/6
Area of study (specialization)	Profile of study
	general academic
Level of study	Course offered in
First-cycle studies	Polish
Form of study	Requirements
part-time	elective

Number of hours

Lecture	Laboratory classes	Other (e.g. online)
8		
Tutorials	Projects/seminars	
10		

Number of credit points
2

Lecturers

Responsible for the course/lecturer:
 Ph.D., Eng. Zbigniew Włodarczak,

Mail to: zbigniew.wlodarczak@put.poznan.pl

Phone: +48 61 665 33 87

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Responsible for the course/lecturer:
 Ph.D., Eng. Aleksander Jurga,

Mail to: aleksander.jurga@put.poznan.pl

Phone: +48 61 665 33 88

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Prerequisites

Knowledge of the basics of management, organization science and the basics of computer science and information systems, especially database systems.

Group work, interest in IT techniques

1

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Course objective

Understand the role of IT systems in an enterprise. To familiarize students with the stages of implementing IT systems and selected methodologies.

Course-related learning outcomes

Knowledge

The student explains basic concepts related to the design and implementation of information systems, including meta-stages of implementation and technical and organizational barriers [P6S_WG_08].

The student identifies and characterizes various stages of information systems implementation according to APICS and different IT implementation strategies [P6S_WG_13].

The student describes the model of the information systems design process and characterizes selected implementation methods, including the Prince2 method [P6S_WG_15].

Skills

The student plans and conducts computer simulations related to the implementation of information systems, interpreting the results obtained and drawing conclusions [P6S_UW_09].

The student analyzes systemic, socio-technical, organizational, and economic aspects of the information systems implementation process, applying the knowledge gained to solve practical problems [P6S_UW_11].

The student performs a preliminary economic analysis of planned activities in the field of information systems implementation, assessing their profitability and efficiency [P6S_UW_12].

Social competences

The student demonstrates an awareness of the importance of a systemic approach in the implementation of information systems, considering technical, economic, marketing, legal, organizational, and financial aspects [P6S_KO_02].

The student appreciates the non-technical aspects and consequences of implementing information systems, including their impact on the environment and society, and is aware of the responsibility associated with the decisions made [P6S_KR_01].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

The lecture grade is based on the percentage of the colloquium. Questions and tasks checking understanding of the issues. Passing threshold - 50%.

Exercise grade is the average of individual tasks performed during classes. The assessment takes into account the correctness and completeness of the results obtained.

Programme content

Basic concepts related to the design and implementation of information systems. Meta stages of IT implementation. Barriers and technical and organizational difficulties of implementation.

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Implementation stages according to APICS. IT implementation strategies. IT system planning process. Model of the design process. Characteristics of selected implementation methods. A detailed discussion of the Prince2 methodology. Practical use of knowledge related to the design and implementation of information systems. Planning the IT system implementation process.

Teaching methods

Lectures: informative lecture, problem lecture, seminar lecture, case method.
Laboratories: laboratory (experiment) method, workshop method.

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Breakdown of average student's workload

	Hours	ECTS
Total workload	50	2,0
Classes requiring direct contact with the teacher	20	1,0
Student's own work (literature studies, preparation for tutorials, preparation for tests, project preparation)[1]	30	1,0

1 delete or add other activities as appropriate
