POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Operational Research and Econometrics

Course

Field of study Year/Semester

Engineering Management 1/1

Area of study (specialization) Profile of study

Managing Enterprises of the Future general academic Level of study Course offered in

Second-cycle studies Polish

Form of study Requirements full-time compulsory

Number of

hours

Lecture Laboratory classes Other (e.g. online)

15 15

Tutorials Projects/seminars

15

Number of credit points

4

Lecturers

Responsible for the course/lecturer: Responsible for the course/lecturer:

Ph.D., Tomasz Brzęczek Ph.D., Eng. Andżelika Libertowska

Mail to: tomasz.brzeczek@put.poznan.pl Mail to: andzelika.libertowska@put.poznan.pl

Phone: 61 665 33 92 Phone: 61 665 33 90

Faculty of Engineering Management Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań ul. J. Rychlewskiego 2, 60-965 Poznań

Prerequisites

algebra rules, basics of probability theory and statistics, operaiting skills in Excel and its formulas

Course objective

Learning to plan and make quantitative and other decisions using methods of constrained optimization. Learning methods of economic relations estimation and applications.

Course-related learning outcomes

Knowledge

1. Student knows typical problems of operation management, analyzes and solves tasks [P7S_WG_02].

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

- 2. Knows graphical method and simplex for linear programming [P7S WG 04].
- 3. Knows chosen optimization methods for multicriteria problems, graphs and networks solving [P7S_WG_08].
- 4. Knows statistics used to assess decisions and risk, knows rules used under uncertainty [P7S_WG_02].
- 5. Knows ordinary least squares method, its assumptions, properties and applications [P7S_WG_03].

Skills

- 1. Student can solve optimization tasks using Excel Solver add-in [P7S UW 01; 03].
- 2. Understands idea of graphical method and simplex algorithm [P7S_UW_04].
- 3. Can identify multi criteria decision tasks and problems that are solved with graph theory [P7S_UW_06].
- 4. Can optimize decision under risk and limit the level of risk [P7S UW 06].
- 5. Can estimate econometrics model, can assess significancy, goodness of fit and analyse results. In particular estimates costs model due to quantity of one or many products and sales trend [P7S UW 02].

Social competences

Is able to persuade mangement practicioners to benefits of optimization and modelling usage [P7S_KK_01-02; P7S_KO_01].

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Partial assessment:

- a) at lecture the modelling and classifing study of optimization case is assessed,
- b) at tutorial there is intrasemester assessment of tasks solving and theory answering.
- c) at laboratory current outcomes are assessed

Final grade:

- a) at lecture results from whole semester course test including open and closed questions about theory and problems to be analysed.
- b) at tutorial solving tasks from topics of second half of semester
- c) at laboratory a group of 2 students use Solver to find out the optimum solution of a case.

Programme content

1. linear programmes (LP) formulation: product assortment, blending problem, transportation and transshipment, multiperiod scheduling, using of Excel add-in Solver

POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

- 2. linear programming. simplex, graphical methods, sensitivity analysis,
- 3. transportation and transshipment problem, balanced, unbalanced supply-demand,
- 4. descrete multigoal tasks and methods, multigoal optimality, ranks, optimization degree, AHP,
- 5. decisions under uncertainty and risk: strategies, news boy, decision tree, spare parts stock,
- 6. estimation of an econometric model with ordinary least squares, assessment of significancy and goodness of fit, and forecasing and forecast expected error calculus.

Teaching methods

lecture focused at problem, tutorial in solving tasks, case study
