

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

Business planning

---

### Course

Field of study

Engineering Management

Area of study (specialization)

Managing Enterprises of the Future

Level of study

Second-cycle studies

Form of study

full-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

Polish

Requirements

elective

---

### Number of hours

Lecture

15

Laboratory classes

Other (e.g. online)

Tutorials

15

Projects/seminars

### Number of credit points

2

---

### Lecturers

Responsible for the course/lecturer:

Ph.D., Eng., Edmund Pawłowski

Responsible for the course/lecturer:

Mail to: [edmund.pawlowski@put.poznan.pl](mailto:edmund.pawlowski@put.poznan.pl)

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

---

### Prerequisites

Management Basics, Financial Accounting

## Course objective

teaching methodology and developing skills for designing and evaluating investment projects

## Course-related learning outcomes

### Knowledge

The student defines and explains the methodologies and procedures of business planning including the annual activities of the enterprise and the design of new businesses [P7S\_WG\_02].

The student evaluates the complexity of business design processes including new business creation and investment planning and knows the standards for technical, organizational, marketing and financial planning [P7S\_WG\_02].

The student demonstrates understanding and application of knowledge of organizational structures, analyzing and modeling them in the context of planning and designing new business ventures [P7S\_WG\_05].

The student analyzes dependencies and interrelationships in various forms of network organizations and applies this knowledge to design business strategies, especially in digital and global contexts [P7S\_WG\_06].

### Skills

The student applies advanced modeling tools and methods to forecast and design business ventures for new and existing organizations [P7S\_UW\_02].

The student independently proposes business solutions and strategies using knowledge of organizational structures [P7S\_UW\_04].

The student analyzes the influence of social, cultural, political, legal and economic factors on business design and formulates hypotheses on the effectiveness of business strategies [P7S\_UW\_07].

The student manages his/her own work and collaborates effectively in project teams, focusing on business design, with an understanding of responsibility and leadership [P7S\_UO\_01].

### Social competences

The student combines knowledge from different disciplines when working in project teams to develop effective business plans [P7S\_KK\_01].

The student identifies cause-and-effect relationships in achieving business objectives and assesses their relevance in a dynamic business environment [P7S\_KK\_02].

## Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

The knowledge of the lectures is verified during the written test. Written test in two versions: 1/ 5 open questions, 2/ 10 multiple-choice test questions. Maximum number of points = 100. Positive score from 65 points.

Knowledge from the exercises is verified by defending the project

## Programme content

The essence and functions of business planning. Methodology of annual business planning of the company. Procedures for designing new business ventures: creating a new company, planning investment ventures in existing companies. Standards of technical, organizational, marketing and financial planning of business ventures.

## Teaching methods

1. lecture: Monographic lecture, case studies
- 2 Exercises: multimedia presentation illustrated with examples given on the board and project execution
