Mail to: joanna.majchrzak@put.poznan.pl

Phone: 61 665 32 92

Faculty of Engineering Management

ul. J. Rychlewskiego 2, 60-965 Poznań

Prerequisites

The student has basic knowledge about the place and importance of marketing in the science system, in

the economy and in the enterprise; knows the basic terminology and scope of marketing; knows and understands basic marketing activities, methods and instruments; has basic knowledge of market aspects of marketing.

Course objective

Acquisition of knowledge, skills and competencies related to concepts, regularities and problem solution methods of marketing in logistic services (MLS).

Course-related learning outcomes

Knowledge

1. Student knows dependencies in the area of marketing and their relations with logistics [P7S_WG_01]
2. Student knows extended issues in the life cycle of socio-technical systems (logistic systems) and the life cycle of industrial products [P7S_WG_06]
3. Student knows detailed methods, tools and techniques characteristic for marketing of logistics services [P7S_WK_01]
4. Student knows determinants of the functioning of companies as participants in logistics processes and their operation strategies [P7S_WK_02]

Skills

1. Student collects on the basis of the literature of the subject and other sources (in Polish and English) and in an orderly manner, provide information on the problem within the framework of logistics and its specific issues and supply chain management [P7S_UW_01]
2. Student makes a critical analysis of technical solutions used in the analyzed logistics system (in particular with regard to devices, objects and processes)[P7S_UW_04]
3. Student prepares in Polish and English language at the B2 level of the European Language Description System a well documented elaboration of problems in the field of logistics [P7S_UK_02]
4. Student identifies changes in requirements, standards, regulations, technical progress and the reality of the labor market, and on their basis determine the need to supplement own and other knowledge [P7S_UU_01]

Social competences

1. Student recognizes causal relationships in achieving the set goals and grading the significance of alternative or competitive tasks [P7S_KK_01]
2. Student is planning and managing in a creative way business ventures [P7S_KO_01]
3. Student is responsible for own work and readiness to comply with the rules of working in a team and taking responsibility for the tasks carried out jointly [P7S_KR_01]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: Formative assessment: during the lectures short discussions are conducted to check the effectiveness of the learning process and to allow the students to see the scope of knowledge they were able to acquire during the class; based on the discussion students working in teams prepared the partial tasks. Formative mark it is the average of the partial tasks. Minimum score to receive formative assessment credit is 51% of points. Summary assessment: the level of obtaining relevant knowledge is summarized in the colloquium. The colloquium might have one of the following forms, i.e., oral answer, written answer, written test, or on-line answer or test. Minimum score to receive lecture credit is 51% of points.

Tutorial: Formative assessment: skills acquired during seminars are verified both based on partial tasks carried out by students in teams. The formative mark is based on the student's presentation of the tasks results and based on the colloquium schedules in the second part of the semester. The colloquium might have one of the following forms, i.e., oral answer, written answer, written test, or on-line answer or test. Minimum score to receive formative assessment credit is 51% of points. Summary assessment: the final mark it is the average of two partial marks obtained by students during the semester; each of the partial mark must be higher than 50% of points.

Programme content

Lecture: Definitions and classifications of logistic services (LS). Outsourcing of LS. Description and marketing analysis of selected LS (transportation, freight forwarding, warehousing, distribution centres, logistic centres, courier services). International logistic services.
