

COURSE DESCRIPTION CARD - SYLLABUS

Course name

Mathematics

Course

Field of study

Logistics

Area of study (specialization)

Level of study

First-cycle studies

Form of study

full-time

Year/Semester

1/1

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

15

Tutorials

30

Laboratory classes

Projects/seminars

Other (e.g. online)

Number of credit points

4

Lecturers

Responsible for the course/lecturer:

Ph.D., Grzegorz Grzegorzczak

Responsible for the course/lecturer:

Mail to: grzegorz.grzegorzczak@put.poznan.pl

Phone: 61 665 26 87

Faculty of Automatic Control, Robotics and
Electrical Engineering

ul. Piotrowo 3A, 60-965 Poznań

Prerequisites

The basic knowledge obtained in high school. The ability to think logically. The ability to mathematical description of simple problems. The ability to work in groups.

Course objective

The acquisition and consolidation of examples of basic mathematical concepts and acquire the ability to use the mathematical apparatus.

Course-related learning outcomes

Knowledge

1. Student knows the basic issues of mathematics in the study of the structure of economic and logistic phenomena [P6S_WG_04]

Skills

1. Student is able to apply appropriate computational techniques to solve a problem within mathematics [P6S_UW_03]

2. Student is able to choose the right tools and methods for solving a problem within mathematics, and to use them effectively [P6S_UO_02]

Social competences

1. Student is aware of initiating activities related to the formulation and transfer of information and cooperation in the society in the field of mathematics [P6S_KO_02]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: Knowledge acquired during the lecture is verified during one test on the last lecture. The final grade consists of a test grade (80%) and a grade for activity during classes (20%). Passing threshold: 50% of the points.

Tutorials: The knowledge acquired during the tutorials is verified during one test at the end of the semester. During the classes, students receive points for activity, 80% of the final grade is the result of the test, and 20% of points for activity. Passing threshold: 50% of the points.

Programme content

Lecture: Elements of linear algebra: matrices and determinants, systems of linear equations, vectors, scalar and vector product, surface and straight line in space. Functions of one variable: graphs of elementary and rational functions, function limits, inverse functions. Differential calculus of one-variable functions.

Tutorials:

Teaching methods

Lecture: oral presentation with examples and formulas, which are presented using a visualizer.

Tutorials: presentation of exemplary tasks on the blackboard and individual solving of similar examples by students - practical exercises.

Bibliography

Basic

1. Foltyńska I., Ratajczak Z., Szafranski Z., Matematyka dla studentów uczelni technicznych, cz. I, WPP, Poznań 2000.

Additional

1. Kryszcki W., Włodarski L., Analiza matematyczna w zadaniach, PWN, Warszawa 1999

Breakdown of average student's workload

	Hours	ECTS
Total workload	100	4,0
Classes requiring direct contact with the teacher	45	2,0
Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests, project preparation) ¹	55	2,0

¹ delete or add other activities as appropriate
