Lecturers

Prerequisites

The student should have expanded and well-established knowledge in the field of chemical and process engineering.

Course objective

Acquiring knowledge about the basics of conducting research, elaborating and reporting research results, especially in the form of a master"s thesis and oral presentation. Mastering the ability to conduct scientific discussions.

Course-related learning outcomes

Knowledge:
1. has expanded and in-depth knowledge in the field of chemical engineering, allowing to formulate and solve complex tasks. k_w3

Skills:
1. has the ability to obtain and critically evaluate information from literature, databases and other sources, and formulate opinions and reports on this basis. k_u1

2. has the ability to present research results in the form of a report, dissertation or presentation. k_u6

Social competences:
1. has formed awareness of the limitations of science and technology related to chemical engineering. k_k2

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Learning outcomes presented above are verified as follows:
Current assessment of speeches (presentation, graphic design, substantive value of the presented results, ability to answer the questions asked).
