

In the academic year 2018-2019, the admission procedure for the M.Sc.-level Software Engineering studies is as follows:

1. Application (deadline is 2018-11-30).

You can send your application using our online admission system: <https://rekrutacja.put.poznan.pl/en/>
(for more information visit <https://www.put.poznan.pl/en/how-apply/studies-english>).

2. Initial verification.

We will verify your application by checking the completeness of the documents and initially assessing the convergence of your previous studies programs with the prerequisites for our program. We will assess applications in batches, therefore, you can expect to receive a response in few days (or sometimes even up to two weeks).

3. On-line test.

Once your application passes through the initial verification, you are invited to take an online test regarding Software Engineering (we are enclosing [the topics](#) being prerequisites for the program). You should start preparing for the test as soon as you receive the information about passing the initial verification. The formal invitation will be sent in the **first week of December**. The online test will also take place in the first or the second week of December.

4. On-line interview.

We will invite the top-ranked candidates for the interview conducted via Skype or similar application. During the interview, you might be asked to perform a short programming task.

5. Final decisions (expected on 2018-12-15 – depending on the number of interviews).
